These products may be ordered directly from Coloplast

### Coloplast Payment Policy

Terms: Net 30 days; all items priced F.O.B. shipping point. Prices and specifications subject to change without incurring obligation.

### Returned Goods Policy

Authorization must be received from Coloplast prior to the return of merchandise. Merchandise returned must have all manufacturers' seals intact and be received within 30 days from date of invoice to be eligible for full credit or replacement. Please contact the Coloplast Urology Products Customer Service Department for details. To obtain a Return Authorization Number, call (800) 258-3476, or fax (866) 216-4161. Returned products may be subject to restocking charges.

### Product Information Disclosure

Coloplast excludes all warranties, whether written or oral, statutory, expressed or implied, by operation of law or otherwise, including, but not limited to, any implied warranties of merchantability, fitness or design. Coloplast shall not be liable for any direct, incidental or consequential loss, damage or expense, directly or indirectly arising from the use of this product. No representation or other affirmation of fact, including but not limited to statements regarding suitability for use, or performance of the product shall be or be deemed to be a warranty by Coloplast for any purpose. Coloplast neither assumes nor authorizes any other or additional liability or responsibility in connection with this product.

### Caution

Federal (USA) law restricts these devices to sale by or on the order of a physician.

### Pricing

Coloplast reserves the right to change its prices without notice.

## TITAN® BRIEF STATEMENT

### Indications

The Titan family of Inflatable Penile Prosthesis is indicated for male patients suffering from erectile dysfunction (impotence) who are considered to be candidates for implantation of a penile prosthesis.

### Contraindications

The Titan device is contraindicated in patients who have one or more of the following conditions: Patients with an active infection present anywhere in the body, especially urinary tract or genital infection. Patients with unresolved problems affecting urination, such as an elevated residual urine volume secondary to bladder outlet obstruction or neurogenic bladder. Patients unwilling to undergo any further surgery for device revision.

### Warnings

Implantation of the device eliminates natural erections, as well as other related treatment options, impossible. Men with diabetes or spinal cord injuries, as well as immunocompromised patients, may have an increased risk of infection associated with a prosthesis. Failure to evaluate and promptly treat erosion may result in a substantial worsening of the condition, leading to infection and loss of tissue. Implantation of a penile prosthesis may result in penile shortening, curvature or scarring. Pre-existing abdominal or penile scarring or contracture may make surgical implantation more complicated or impractical. The risks and benefits of implanting this device in patients with lupus, scleroderma, myasthenia gravis, or documented sensitivity to silicone should be carefully considered.

### Precautions

A thorough preoperative consultation should include a discussion between the patient and physician of all available treatment options and their risks and benefits.

### Potential Complications

Scrotal swelling, auto-inflation, discomfort, angulation/curvature, edema, device malfunction/deflation, pain, difficulty with ejaculation, transient urinary retention, fever, migration, patient dissatisfaction, infection, hematoma wound leakage, bleeding, delayed wound healing, phimosis, sensory loss cylinder aneurysm, fibrous capsule formation, over/under inflation, erosion, scrotal erythema, genital change, inguinal hernia

See the device manual for detailed information regarding the implant procedure, contraindications, warnings, precautions, and potential complications/adverse events.
